“Milankovitch Cycles”

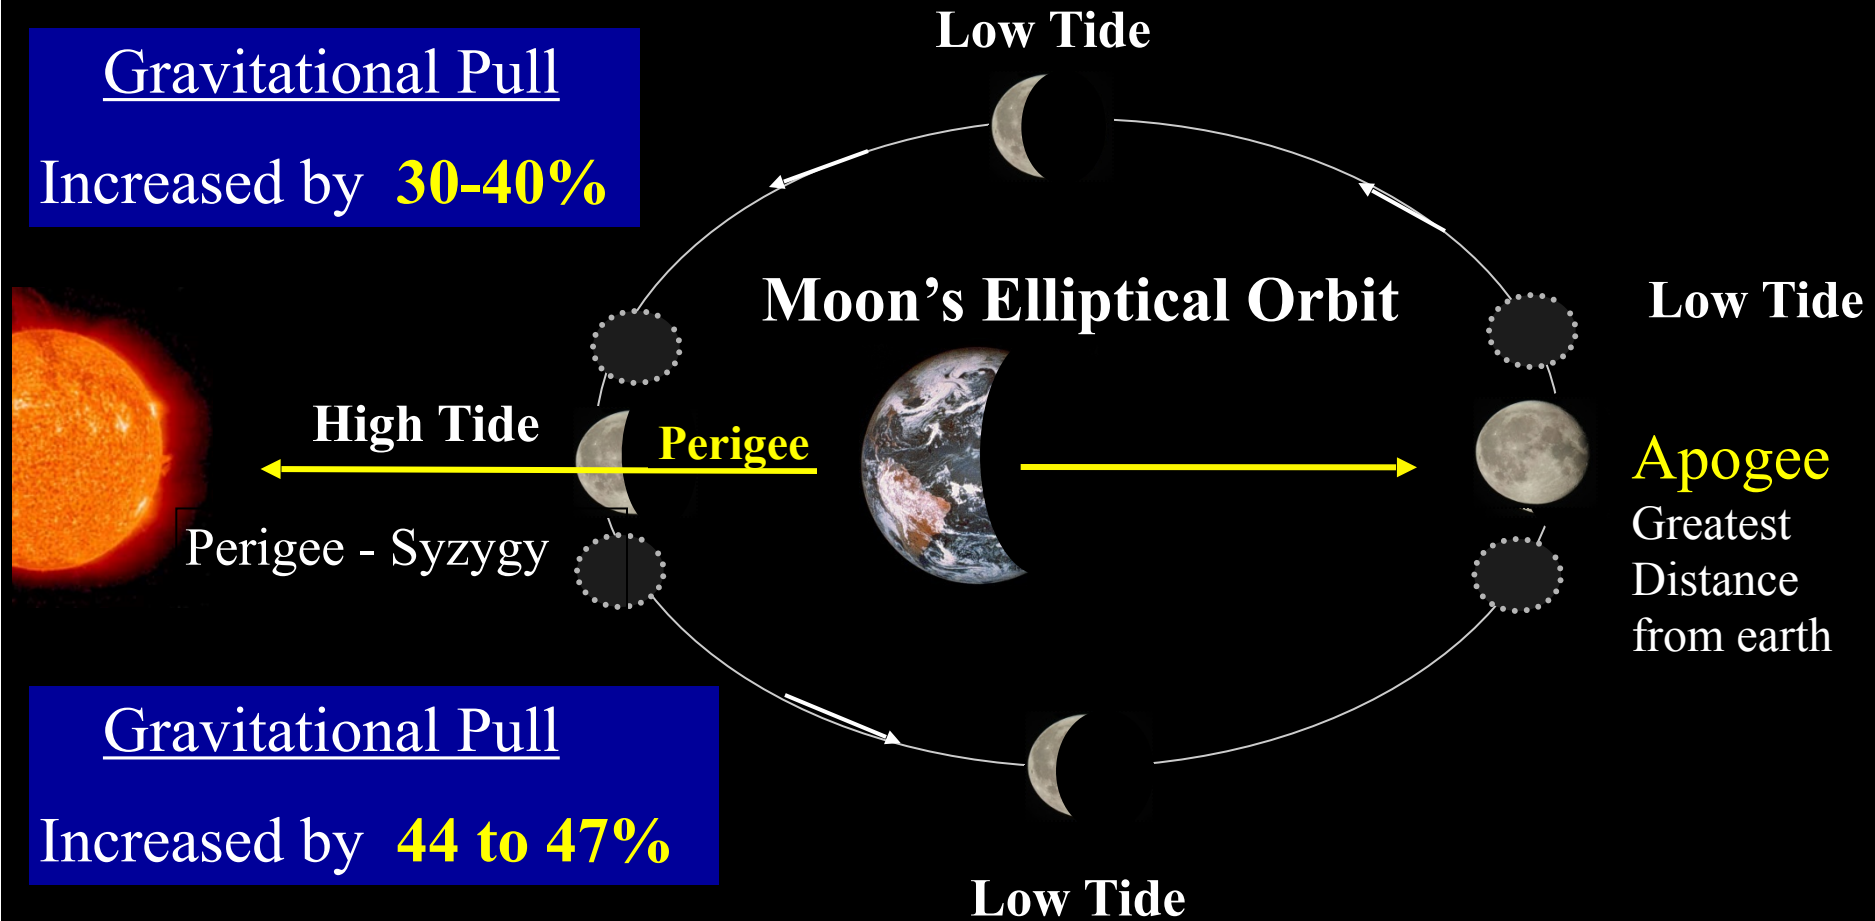

Earth's Vibrant - Awake Periods Every 120,000 Years

Today

Lunar Solar Procession Controls

El Niño - Hurricane Cycles - Climate Cycles

4 Degrees = 240 miles

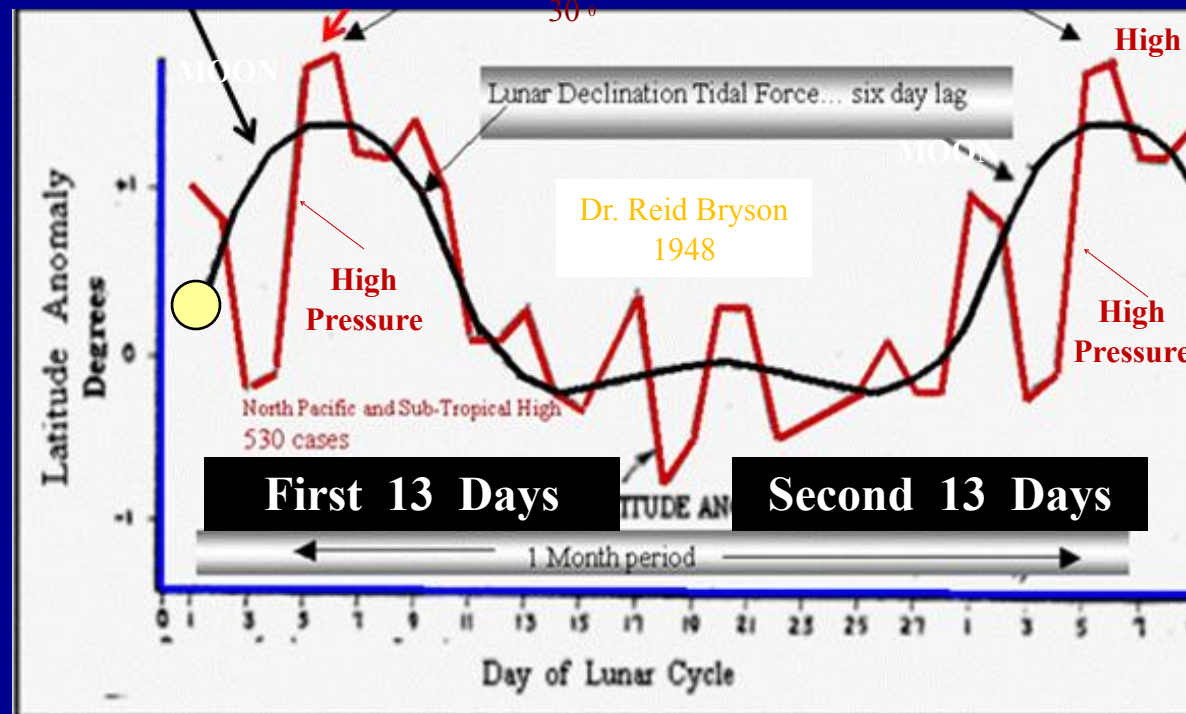

Magnet pulling New Jersey's climate north to Maine

Arctic Pulse Warm Water

During Global Warming
Meanders
3 to 5 degrees latitude

**Pulls High
240 miles**

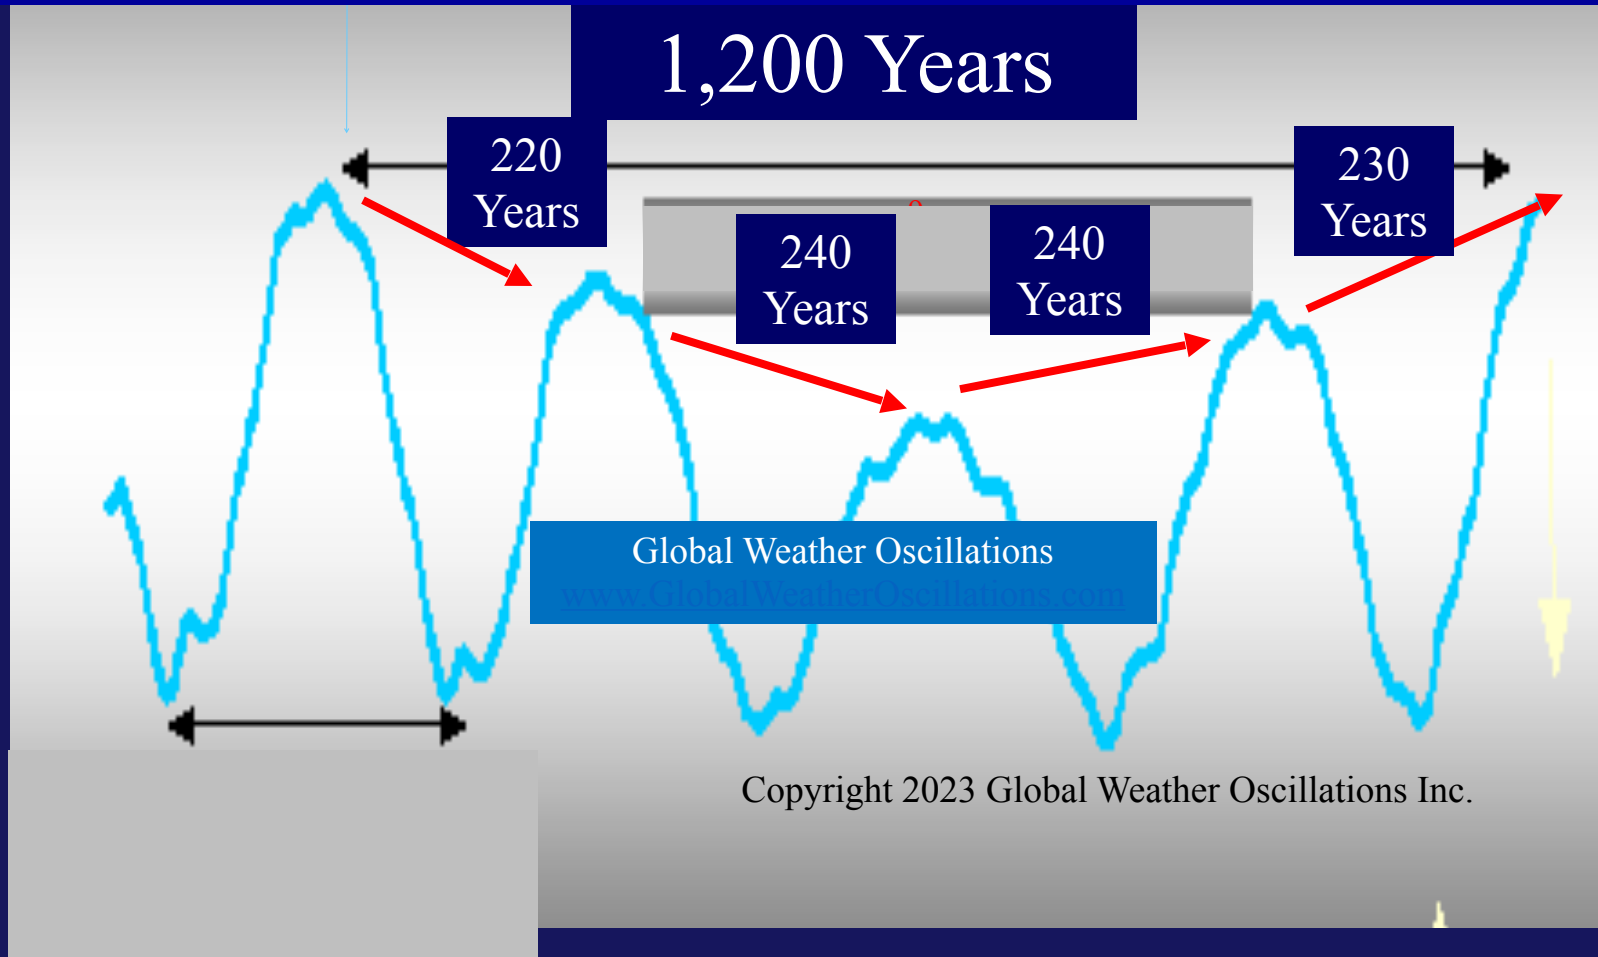

**Dr. Reed Bryson
Father of
Climatology
1948**

230-Year **Strong** – **Electro Magnetic** Gravitational Cycles

Also

9-year and 72-year cycles

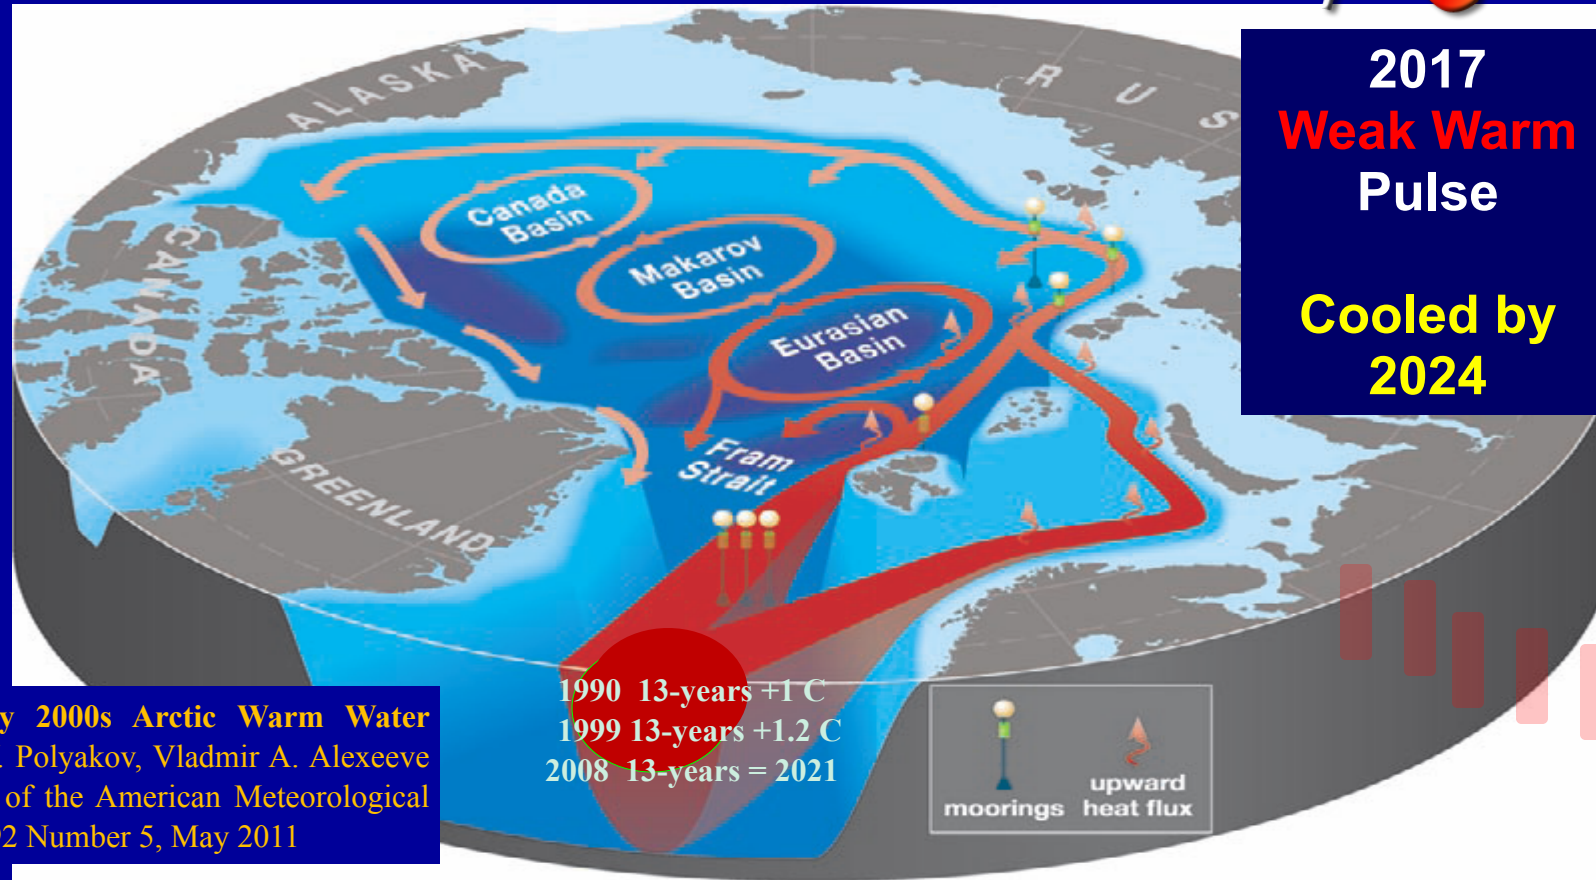

Approximate 9 Year Pulse Cycles Every 72 Years

Warmest - Arctic Water Pulse Every 230 Years – (9 year pulses)

Fate of Early 2000s Arctic Warm Water Pulse Aigor V. Polyakov, Vladimir A. Alexeev et al, Bulletin of the American Meteorological Society, Vol. 92 Number 5, May 2011

During the 1998 Global Warming Peak, the warm pulse occurred from 1990-93 and again 2004-07, Warms the Arctic waters below the ice caps

Up to 1 Degree Celsius above normal Arctic Boundary Current from the Atlantic...provides the largest input of water, heat, and salt into the Arctic Ocean; the total quantity of heat is substantial, enough to melt the Arctic sea ice cover several times over.
